LMS Development

We can support you in the design and development of a Learning Management System (LMS) where your eLearning courses will be hosted. A typical LMS allows you to host and deliver the courses, register learners, track the learners and their progress, provide assessments, scoring and reports on learners, amongst others. The industry standard for LMS is to be able to host multi-media courses including SCORM compliant interactive courseware, videos, audios, documents, and text.

Content Creation

Our team develops eLearning content in various areas of professional and life skills. Our expertise and experience in learning design together with our understanding and experience with eLearning authoring tools ensures that we develop and eLearning content that meets the learning needs of our clients and is compatible with the various learning management systems and platforms that our clients use.

Content Conversion

We work with organizations to convert their existing learning content, usually captured in Presentation Slides and Handouts to eLearning content that is interactive using various eLearning authoring software. While converting, we enhance your existing content to reflect adult learning principles and to include experiential tools and methodologies. This ensures that you can scale the coverage and impact of your existing training.

A photograph of a laptop on a white desk. To the left of the laptop is a wooden pen holder filled with colorful pencils and a white ceramic vase. To the right is a large, textured white ceramic vase. The laptop screen displays the text "Our Solutions" in a large, bold, black font.

Our Solutions

eLearning Overview

As organizations aim to scale the impact of learning interventions and create true learning organizations, asynchronous eLearning has become the most effective means of achieving this. With the right technology, tools and expertise, organizations of any size can deploy eLearning solutions that will build the capacity of their employees, vendors, customers, and other stakeholders and ensure that the desired behavioural change and impact that they desire from these learning interventions are achieved.

Why eLearning?

Organizations all around the world are embracing self-paced asynchronous eLearning for many reasons including but not limited to:

- o Cost Effectiveness
- o Scale and Impact
- o Standardization
- o Support to Traditional Learning
 - o Self-Paced
- o Flexibility & Convenience
- o Community of Practice
- o Measurability

Why PeopleTech?

- o Local Content & Context
- o Track Record and Expertise
- o Experience with eLearning Authoring Tools
- o Experience in Experiential Learning Design
- o Responsive and Efficient Service Center
